INTRODUCTION

Since the dawn of time, there have been only small gaps in our economic history where investment and business opportunities like crypto have been possible. The Crypto Market has experienced a huge development within 1 year. The importance of decentralized exchanges and the importance of decentralization have been proven. As a team, we could not remain insensitive to this development and decided to fill a gap.

Lately, we have seen the Binance Smart Chain's (hereinafter: "BSC") immense growth, together with its native token, BNB. To help create the ecosystem that Ethereum has become, with the benefits that BSC delivers- We will be the largest tool solutions provider in BSC.

Ape Tools will be indisputable price tracker on BSC. A truly tracker alternative for decentralized finance. However, Ape Tools is more than just a price tracker, it will also let you track almost anything on decentralized exchanges. With the Data that we provide, our users will have experienced a data analysis program where they can monitor their investments in DEXs instantly.

Why ApeTools?

Although the largest AMM on the Binance Smart Chain was Pancake Swap, we now knew that Pancake Swap would have a few competitors like Ape Swap. Recently, Ape Swap's developer-friendly and user-friendly behavior

has led us to Ape Swap. We decided to bring out the best tools in the BSC network from a strategic and marketing point of view to the Ape Swap ecosystem. Although we do not have an official and organic connection with Ape Swap yet, we want to conclude the negotiations as soon as possible and become one of the most successful projects of the Ape Swap ecosystem.

WHY BINANCE SMART CHAIN?

Several factors made us choose to develop and to build on BSC. One of the reasons is that the chain is promising and has many legit resources to back it up. Changpeng Zhao (CZ), the creator of Binance, BSC, and BNB, has personally stated that they will be pouring many resources to get developers over to Binance Smart Chain. Additionally, the ridiculous gas fees currently plaguing Ethereum renders the chain useless for ordinary retail investors. Besides, BSC's transaction fee costs a few cents every few seconds. The block time is also much shorter. On Ethereum, the block-time is 30 seconds, while on BSC, it is 3 seconds.

In addition, we chose Binance Smart Chain because one of the main objectives of our Project is to be able to analyze tokens in decentralized exchanges. The most important benefit of Binance Smart Chain is the ease of launching projects. The excess of these smart contracts created on Binance Smart Chain motivated us. The cheapness of the Binance Smart Chain has also made it easier for people to invest in such boutique projects. We will help these projects to be followed more easily and to develop strategies.

APETOOLS WORKS?

First, Ape Tools' main purpose is a price tracker that will help you analyze the graph of smart contracts you could not find. But more than that. At the same time, it is a data analysis and investment control product whose features increase according to membership, or the amount of TAPE staked. Ape tools monitors LP prices and last transactions using various APIs, and thus instantly reveals the graph of the desired token. This translates the incoming data into the trading view chart and allows investors to perform technical analysis on the token they receive. In addition, it notifies its investors with price alert.

It also monitors the APRs of Liquidity Pools and gives the last 30 days instant APR of the selected LP. In this way, it provides investors with strong data about pools and farms.

The \$TAPE token?

Ape Tools' TAPE token is deployed on Binance Smart Chain and follows the BEP-20 token standard. Tape Token is the governance and staking token of Ape Tools. Although at first, we thought only for the membership tier list, we realized its potential and decided to build the project on itself. TAPE's use case is four folded:

- 1) Staking for Rewarding System and IDO
- 2) Membership tier list
- 3) Governance
- 4) Informetric Access

STAKING REWARDS SYSTEM

Our goal is to make TAPE a strong community token rather than just a governance or tier token. Therefore, in the Upcoming Listing tab, we will airdrop new BSC projects that have signed agreements with Ape Tools to holders who stake TAPE. In this way, those who hold TAPE in their hands will both benefit from premium features and will be rewarded thanks to the airdrop.

NFT PLANS

As Ape Tools, we could not forget NFT, the favorite of the crypto world. One of our plans is to create an NFT price tracker. Looking at the past trading of ERC-721 tokens, we want to create a graph of the corresponding NFT artifact price. We are currently in the observation phase of this project and will continue to watch this stunning world of the NFT world.

DASHBOARD

Dashboard feature should be one of the most important features of Ape Tools. Thanks to the dashboard, investors will be able to monitor the investment in their wallet. In addition, they will be able to monitor their earnings and their LPs in DeFi activities such as staking, pooling and farming.

INFOMETRICS

In the Informetric section, users will be able to access the roles of past ICOs. We will also create a database. In this way, they will be able to examine

successful projects in the past. We are also working on interesting projects such as Moon sheet generators. In this way, we will make our community more knowledgeable.

GOVERNANCE

We see crypto as a democratic currency. For this reason, we care about our community and want to decide with them. That is why we want every TAPE holder to be influential in our decisions. Decisions will be made on-chain by delegating \$TAPE tokens to proposals.

TOKENECONOMICS

(Hardcap expected)

Private Sale (\$0.01)	25,000,000	Vested (35-35-30)
Public Sale (\$0.024)	20,000,000	Unlock
Strategic Investment	10,000,000	Vested (30-10 every 2 mo)
Marketing	10,000,000	Vested (25-25 every 3 mo)
Team	10,000,000	Vested (10-30 every 3 mo)
Liquidity(DEX-CEX)	25,000,000	Locked
Total	100,000,000	

Listing Price : \$0.03

Private Sale			Public Sale	
25 M (\$TAPE)	420 BNB hard cap		20 M (\$TAPE)	800 BNB hard cap
(=\$0.01)			(=\$0.024)	
Price: 1BNB=60.000 \$TAPE(\$0.01)			Price 1BNB= 25000 \$TAPE(\$0.024)	

/BNB PRICE 600\$ DETERMINED

ROADMAP

Q2-2021

- Private Sale
- Public Sale
- Aggressive Marketing
- Listing on PancakeSwap or ApeSwap
- CMC and Coingecko Listing
- ApeTools v.Alpha

Q3-2021

- ApeTools v.Beta
- Pair and Pool Explorer
- Dashboard
- Staking Reward System
- Membership System
- App Launch

Q4-2021

- NFT Tracker
- Governance System
